

Frequently Asked Questions

New Trading Engine

- 1. Will the go-live be a direct cutover, or will the previous version remain available during a parallel run?**
 - A. There will be no parallel runs for the implementation of the New Trading Engine. The Exchange will implement a big bang approach.
- 2. In what environment will the Market Rehearsals (MR) be conducted?**
 - A. MRs will be conducted in the Pre-Production environment.
- 3. Is it mandatory to participate in all three MRs?**
 - A. We encourage all Trading Participants (TP) to participate in all the MRs.
- 4. For Market Rehearsals, should TPs use the new production links?**
 - A. TPs must use the new production link to be provided by Exchange.
- 5. Will certification test packs or MR test scripts be provided?**
 - A. The Exchange will provide test scripts for the MRs.
- 6. Will Negotiated Trades replace the current Block Trade/Block Sale? How are they different from each other?**
 - A. No, Negotiated Trades will not replace the current Block Sale. Instead, Negotiated Trades is a variant of the existing Block Sale framework designed to address an existing business requirements in the execution of pre-arranged transactions.
- 7. With the standard lot size set to 1, does this mean there will no longer be an Odd Lot market?**
 - A. Yes, with the standard lot size set at 1, the Odd Lot Market will no longer be available in the New Trading Engine.
- 8. Where the Negotiated Trades be executed?**
 - A. Negotiated Trades will be executed through a web-based platform, similar to the VWAP facility.
- 9. What will happen to the leased line after UAT?**
 - A. The TPs may opt to leave the leased line in UAT or have it transferred to DR.
- 10. What types of orders will be supported and implemented in the New Trading Engine (TE)?**
 - A. On Day 1 of the New Trading Engine, only limit order will be supported.
- 11. Will Negotiated Trades be included in the day's total trading value for ranking purposes?**
 - A. Yes, Negotiated Trades will be included in the day's total trading value, as they are treated as regular trades *(subject to further confirmation)*.
- 12. Will Negotiated Trades data be available through the Market Data Feed?**
 - A. Yes, Negotiated Trades details will be disseminated through the Market Data Feed as news/announcement.

PSE Back-Office

- 1. Can brokers request for additional PSE Portal user accounts beyond the current limit of two users?**
 - A. Yes, requests for additional PSE Portal users may be submitted but will be subject to approval. Please email the details of the additional users to helpdesk@pse.com.ph.
- 2. Are there any changes to the format of the PSE EOD files (e.g., CTF and ABC)?**
 - A. There are no changes to ABC and Consolidated Trade File (CTF) file specifications.
- 3. Will the End-of-Day (EOD) module include CTF and ABC files?**
 - A. Yes, ABC and CTF are already available for download in the new PSE Portal.
- 4. Will negotiated trades be included in the CTF?**
 - A. Yes, Negotiated Trades will be included in the CTF and other EOD reports.
- 5. Will all Weekly Tax Report data in iPSE, including historical records, be migrated to the new system?**
 - A. No. The data available in Deals is limited to Year-to-Date (YTD) information, while the Weekly Tax Report contains data from August 3, 2026 onwards. Please note that data migration is still in progress.
- 6. Do we have to apply for a new leased line to connect to the new trading engine or will our existing leased line connection be sufficient?**
 - A. At least two (2) leased line is required for PROD and UAT/DR. UAT and DR can share the new leased line, however when they request to port it from one environment to another, they need to pay a certain cost.

PSETradeX

- 1. What are the minimum PC specifications compatible with the new PSETradeX trading platform?**
 - A. The migration to the new trading engine has no impact on current minimum requirements for PSETradeX trading platform. Please refer to the PSE website under *Trading > PSE Trading Engine 2026 > Access to PSETradeX*.
- 2. Can we continue using our current leased line connection that is being used for PSETradeX?**
 - A. Yes, there no changes in the connection for PSETradeX.
- 3. Is a leased line required for connectivity?**
 - A. For PSETradeX, there is no need for a new leased line.

Connectivity - Market Data

- 1. When can the final version for FIX and ITCH/MRF Specs be sent to TPs / Vendors?**
 - A. The final specs has been released last July 23, 2026.
- 2. Is September 23 the deadline for FEOMS certification?**
 - A. No, TPs can still request for certification beyond that date.

3. When will the IP addresses for the new servers be available?

A. The IP addresses have been included in the credentials sent to the TPs starting July 10, 2026 onwards.

4. Are the new server IPs already available? How were some TPs able to complete UAT connectivity testing?

A. New IP servers are not yet available. Only point to point testing has been completed.

5. Will the MDF and ITCH protocols each have their own dedicated connections and incoming data feeds, similar to the current setup for TotalView and Index?

A. Yes. The MDF and ITCH protocols will each have their own dedicated TCP connections and incoming data feeds. Similar to the current implementation, clients will establish separate connections for each protocol.

6. For the MDF protocol, is the retrieval and parsing process similar to the ITCH protocol? Will the connectivity also be established via SoupBinTCP?

A. Yes. Similar to the ITCH protocol, the MDF feed is delivered over SoupBinTCP. Clients should establish a SoupBinTCP session to receive the MDF data and implement message parsing based on the MDF message specification. Although both protocols use SoupBinTCP for connectivity, the message formats and message types differ between MDF and ITCH and should be parsed according to their respective specifications.

7. Is there a plan to add a flag to identify Cross Trades in market data feed?

A. Cross Trade information is provided through the Cross Indicator field in the Order Executed with Price [C] and Trade [P] messages.

8. Will Negotiated Trades data be available through the Market Data Feed?

A. Yes, Negotiated Trades details will be disseminated through the Market Data Feed as news/announcement.
