I. Background

The governing laws and rules on short-selling have been in place since 2010. Its implementation, however, awaited the implementation of the PSE's new trading system ("PSEtrade") and the Securities Borrowing & Lending ("SBL") program. With both pre-requisite systems now in place, PSE developed the implementing guidelines to govern the conduct of short-selling.

PSE will be providing the market daily with information on the volume of short-sold securities. This will be done by consolidating balances regarding short-selling from Depository Participants ("DPs"), Other Depository Participants ("ODPs"), and the Depository to generate a PSE Short Selling Report which contains the short interest per stock. Short Interest Ratio ("SIR") is the percentage of short-sold security per stock.

According to the PSE rule, SIR must not exceed the maximum level which is 10%. DPs such as Trading Participants ("TPs"), ODPs such as Custodian Banks ("CBs"), and Lending Agents ("LAs"), and the Depository will be required to report the borrowing and lending per stock for the transactions executed in their own system.

II. Document Description

This document provides the report specifications which will be submitted daily by the DPs in the iPSE website, and ODPs and the Depository via File Transfer Protocol ("FTP"). The guidelines in submitting the report are also included in this document.
